PaybizMFA

An Innovative Multi-factor Authentication Solution by Netfotech Solutions

Fortify Your Digital Security with PaybizMFA

What is PaybizMFA?

In today's fast-paced digital environment, security is more critical than ever. Protecting sensitive information from unauthorized access requires robust solutions that go beyond traditional passwords. That's where PaybizMFA steps in as a powerful, easy-to-use Multi-Factor Authentication (MFA) solution designed to secure your digital assets effectively.

PaybizMFA is a comprehensive authentication system that adds an extra layer of security to your online accounts and applications. By requiring multiple forms of verification before granting access, PaybizMFA significantly reduces the risk of unauthorized access, ensuring that your data remains safe and secure.

Benefits of PaybizMFA

Provide increased security

Addresses compliance regulations

Reduces legal risks

Lessens the impact of password offenses

Improves usability

Help take a step toward a zero trust model

Multiple Authentication Features

- » Effortless Integration with mobile banking apps (via light weight SDK)
- » Standalone downloadable App availability
- » Smooth authentication across all payment channels
- » Consistent authentication for accessing any asset
- » Provides consistent authentication for access (any asset or transaction)
- » Step - up authentication when needed
- » Device binding utilization to distinguish b/w genuine users and fraudsters
- » Prevents abandoned carts and reduces latency (caused by OTP delivery delays)
- » Customizable range of authentication methods as per consumer preferences , include:
 - Offline OTP
 - Push notifications
 - Biometric authentication
 - Passcode options

Key Elements of MFA

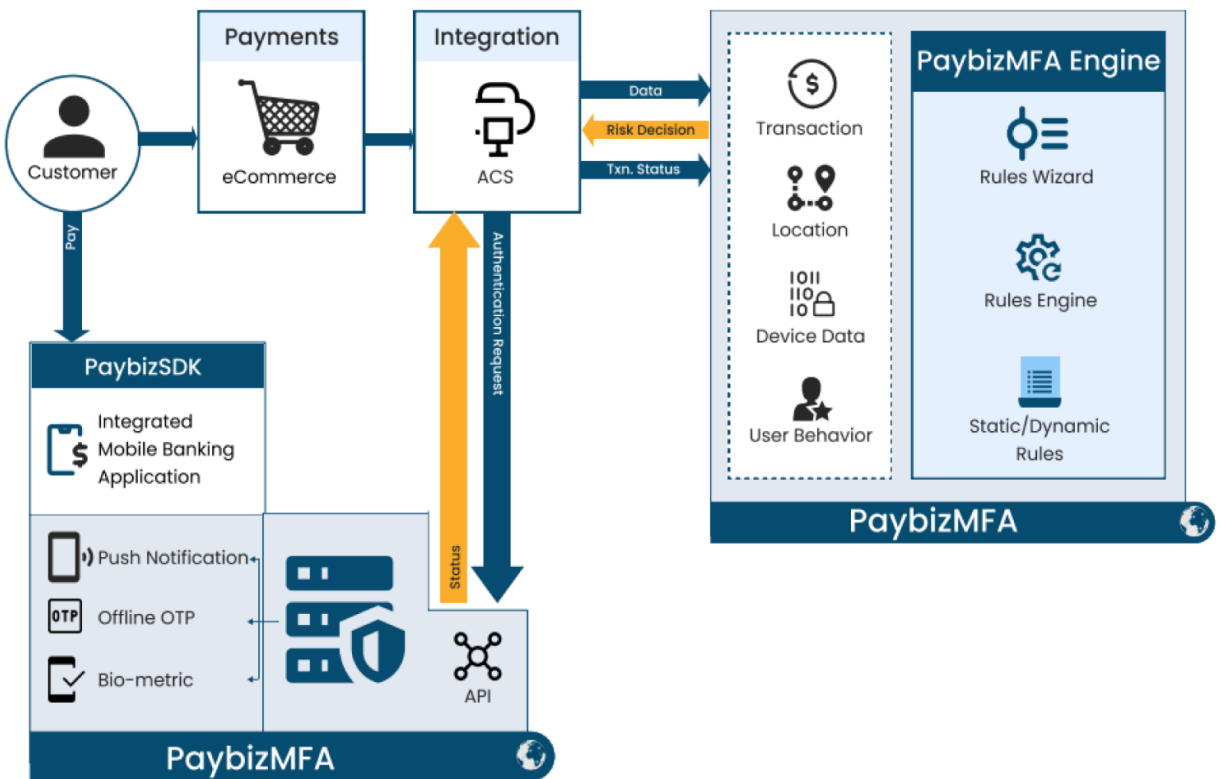

Elements of Multi-factor Authentication

How PaybizMFA Works?

PaybizMFA enhances security by requiring users to verify their identity through multiple methods before gaining access to an account or completing a transaction. When a user tries to log in or perform an action, PaybizMFA prompts them to provide additional verification, such as an OTP (One-Time Password), biometric scan, or a push notification. This multi-layered approach ensures that even if one authentication factor is compromised, unauthorized access is still prevented

By integrating with various platforms, PaybizMFA offers seamless authentication across all channels, making it easy for users to securely access their accounts and complete transactions

PaybizMFA - Process Flow & Integration

Use Cases: Validate Your Customer Identity With Ease

Multi-factor authentication (MFA) secures online payments by verifying user identity, protecting merchant accounts, and reducing fraud, especially in high-value transactions. It ensures compliance, limits access to payment systems, and safeguards customer data from unauthorized access.

Why choose PaybizMFA?

PaybizMFA is your trusted solution for securing access with multi-factor authentication. By adding an extra layer of protection beyond passwords, it significantly reduces the risk of unauthorized access. With flexible authentication methods like OTPs and biometrics, PaybizMFA offers both robust security and a seamless user experience. It's designed to meet compliance requirements and easily scale with your business, making it an ideal choice for organizations of all sizes.

01

Flexibility of Delivery with Source Code

Our USP is to provide a customized solution with the option to deliver it with source code and get yourself free from the costs related to future change requests.

02

Cost-effective

We offer solution at competitive man-day rates while maintaining the high-quality standards of development.

03

Reduced Compliance Burden

Simplifies meeting regulatory requirements, reducing the risk of non-compliance penalties.

04

Containerized Deployment

We offer containerized deployment option with microservice architecture to achieve scalability allowing independent deployment & easy integration.

05

Future-Proof

Continuously upgrading solution to adapt to evolving security threats and regulatory changes.

06

Free POC

We offer free personalized Proof-of-Concept option to the interested clients to experience firsthand how our toolkit can add value to your business.
